

# Laiba Mehnaz

+1 929 584 4743 | [lm4428@nyu.edu](mailto:lm4428@nyu.edu) | [Website](#) | [linkedin](#) | [github](#) | Earliest start date: November 2023 onwards

## EDUCATION

### New York University, Tandon School of Engineering

May 2023

*Master of Science in Computer Science*

*Relevant coursework: Design and Analysis of Algorithms, Machine Learning, Deep Learning*

### Delhi Technological University, New Delhi, India

May 2020

*Bachelor of Technology in Software Engineering*

*Relevant coursework: Data Structures in Java, Database Management Systems, Object Oriented Programming*

## TECHNICAL SKILLS

**Languages:** Python, Java, C/C++, R, SQL

**Technologies:** PyTorch, TensorFlow, AWS EC2, AWS SageMaker, HPC, SLURM, Singularity, Keras, Numpy, Pandas, Scikit-Learn, Git, Shell Scripting, Linux, SpaCy, Data Visualization, Tableau

## WORK EXPERIENCE

### Applied Scientist Intern, Natural Language Processing

May 2022 – Aug 2022

*Amazon*

*Seattle, USA*

- Built a pipeline to experiment with different model architectures and tokenizers for domain adaptation of LLMs to tasks/domains/datasets, using PyTorch and Huggingface transformers on AWS.

### Assistant Research Scientist

July 2023 – Present

*New York University*

*New York, USA*

- Developing R packages for supervised learning algorithms, GANs, Monte Carlo simulation, and statistical analysis(regression) for time series data in Economics. [\[blog\]](#)

### Research Graduate Assistant(Open-Source Software Development)

Mar 2023 – May 2023

*New York University, VIDA lab*

*New York, USA*

- Developed Huggingface support for the scikit-learn based alpha-automl library to use any LLM for feature extraction and model training, on NYU high-performance computing cluster(HPC). [\[code\]](#)
- Provided unit tests for the same.

### Research Assistant, Natural Language Processing

June 2020 – June 2021

*MIDAS lab, IIT-Delhi*

*New Delhi, India*

### *Conversation summarization and translation, conversational AI*

[\[paper\]](#)

- Led a team of 8 students in data annotation to release a large-scale dataset for code-switched Hindi-English conversations.
- Built a Python framework using object-oriented design to compute and visualize statistical code-mixed metrics for analyzing Hindi-English code-mixed conversations. [\[code\]](#)
- Trained and fine-tuned several deep learning language models (LLMs) to summarize and translate conversations written in code-mixed Hindi-English to English.
- Created an evaluation framework for summaries generated by these LLMs, to show the limitations of the models for conversational data and code-switched data.

### *Probing the domain robustness of deep learning language models*

[\[paper\]](#)

- Created a pipeline for data cleaning, data preprocessing, and training a classifier, at each layer of BERT for the task of probing.
- Conducted an analysis using the probing results to show the quality of the pretrained word embeddings when used in a different context/domain/dataset compared to the training dataset.

### Research and Development Group Lead

*AI for Scientific Research, New York University(part-time)*

Jan 2023 – Present

*New York, USA*

- Leading the AIfSR group at NYU, by establishing collaborations with professionals in natural sciences to help with AI/ML, interviewing students, training and supervising students in product/paper delivery in a cross-disciplinary environment.
- Created the tutorial for using LLMs using Huggingface on NYU HPC cluster for feature extraction. [[tutorial code](#)]
- Presented and showcased group's work at NYU's annual Research Expo 2023.
